Wednesday 11th July 2018

Dear Parents and Carers,

Re: Case of Measles

As you will see from the letter overleaf, it has come to our attention that a pupil who attends Woodberry Down Primary School has recently been diagnosed with measles.

The letter from Public Health England advises you as parents and carers as to what you should do if your child has not had an MMR vaccination or has a weakened immune system. It also gives you advice as to what you should do if you think that your child may have measles now.

In addition to the letter overleaf, we attach an information sheet which gives further information about measles including how infectious they are and how serious the virus can be.

To our knowledge, no other children or staff have contracted measles from this confirmed case.

In the meantime, if you have any further questions, you can access support at NHS Choices website.

Many thanks,

Derek Hewie
Headteacher
